SEED SPECIALISTS
Food from thought

Feeding Fresh Cow YMCP immediately after calving **reduces the risk rumen displacement** and milk fever by ensuring smooth muscle performance that is so vital for a healthy uterus, rumen and teat function. By feeding Fresh Cow YMCP at <£6/cow on farm, you can significantly reduce the risk of vets bills associated with displaced abomasums (£500), retained placenta (£300), milk fever (£300) and the effects of heat stress.

Unit 8, Burnside Business Park, Burnside Road, Market Drayton, Shropshire, TF9 3UX Tel: 01630 655 722 Fax: 01630 652 290 sales@bcwagric.co.uk www.bcwagric.co.uk
