Supplementary feeding

An option available under **various stewardship schemes** (although it doesn't have to be and can be carried out voluntarily), supplementary feeding is a **vital practice** to support farmland birds. Supplementary feeding refers to the regular distribution of a range of seeds over **wintered stubbles**, on farm tracks and alongside/in wild bird seed plots. Using a mixture of cereal, oil seed and

Windier Weather!

With the recent windier weather we've had ensuring your buildings are ventilated but not too open is an important aspect of design!

Secure Windbreaks are a cost effective means of converting an open shed & shielding livestock from the elements, whilst maintaining a through flow of air.

Secure Econoblinds provide the same protection but are fitted on to a pulley system which allows them to be raised & lowered as required. This is ideal in areas where vehicular access is needed for feeding/bedding etc.

SECURE COVERS®
SILAGE COVERS & WINDBREAKS

Shooting season!!

Shooting season has officially begun! At BCW we have a range of quality shooting gear, designed to be practical and to make you look the part!!

We also have a wide range of cartridges available! Call in store to check out the range and discuss your shooting requirements for this

Rodenticides

Please ensure if you are purchasing professional rodenticides on a farm assurance exemption that you supply us with an up to date declaration!

This will need renewing every time your scheme renews!

Winter housing wormers

Whilst grass leys are still growing well and enabling you to keep your stock out at present thoughts should turn to when you do bring your cattle in! Worming cattle at housing is a prime opportunity to clear them out of any worms they may be harbouring with no risk of exposure to fresh ingestion!

Zermex 0.5% Pour On:- A moxidectin based pour on offering an 8-10week dosing interval and a short withdrawal period of only 14days!!!

Premadex 0.5% Pour On:- An ivermectin based pour on for the treatment of gastro-intestinal nematodes, lungworms and a range of other pests! For use on beef and non-lactating dairy cattle. A slightly shorter 7-8 week interval with a 28 day meat withdrawal, useful for youngstock and dry cows!

BCW Christmas Toys
